

What is Wireless Field Control?

Wireless Field Control delivers breakthrough productivity for businesses with mobile staff, eliminating the wasted travel time, constant interruptions, delays, inaccuracy and lost paper work that kill productivity and profits.

Unlike expensive integration and custom programming approaches to wireless, our chosen service, JumpStart Wireless' has a patent pending Artificial Intelligence platform that affordably creates wireless versions of existing manual and paper-based business processes.

Your wireless forms move data to and from your existing office-bound corporate software. JumpStart Wireless cost-effectively delivers your specific forms and business processes to a wide variety of wireless phones and PDA devices.

Features

- Time & Attendance
- Connected and disconnected operation
- GPS Location Tracking
- Bar-coding, printing, and signature capture
- Customizable by customers
- Centralized management and configuration
- Every form and task is secure and reliable

Benefits

- Reduces operating costs
- Increases productivity in the field and office
- Eliminates faxes and extra trips to the office
- Streamlines business processes
- Minimizes training costs with wireless versions of existing processes and forms
- Automatically and instantly delivers work orders, inspection reports, time sheets, and other job information to and from office-bound software.

Are your field operations wasting time and money?

- Your staff wastefully spends hours each day traveling from your offices to the job site, often to simply pick up or drop off paperwork. Just communicating essential information to and from headquarters is a complex, wasteful mess.
- You have huge backlogs of completed work needing to be closed out.
- Valuable staff time is wasted correcting errors, understanding illegible writing, and chasing down missing paperwork.
- Your office staff spend hours manually entering field data.
- Inefficiencies, errors and miscalculations, duplication, lack of coordination and piles of paperwork waste time and money.

Now you can eliminate ANY paperwork currently being used by your field staff! Paperwork eliminated:

- Work Orders
- Daily Reports
- Change Orders
- Time Cards
- Inspections
- Inventory
- Punch Lists
- Order Entry
- Purchasing

By simply reading and filling out information on their cell phones or PDA, your field staff automatically and wirelessly delivers critical information back to the billing and accounting software at the office.

Information includes:

- Work Completed
- Hours to Be Billed
- Problem Summaries
- And More!
- Parts Used
- Tasks Completed
- Completion Check Lists

Why enter data twice - enter it once!

Enter the data in the field and you can invoice customers that day! Take your field operations to a new level of efficiency and watch your staff productivity soar!
